PRIVATE SUPPORT FOR THE PATH AHEAD

## A steadier next step.

SoberPath by Monado is a calm, non-clinical recovery companion for the moments you plan for — and the ones you don't. Check in, find practical support, reflect, and keep moving without shame.

Private by design

One small step matters

### THE CHALLENGE

Build a calm, useful companion for people changing their relationship with alcohol. Make check-ins, reflection and practical support easy to reach while giving users control over sensitive information and keeping AI within non-clinical boundaries.

### THE ENGINEERING

Native iPhone, iPad and Apple Watch experiences. SwiftData storage and private CloudKit sync. Apple model integration with device-dependent on-device or Private Cloud Compute processing. Discreet widgets and watch surfaces. StoreKit subscriptions, with continued access to existing records, export, deletion and urgent-help information.

### THE RESULT

Published on the App Store by Monado Limited for iPhone, iPad and Apple Watch. Daily check-ins, reflection, AI conversation and practical support work together in one product. Membership controls retain access to existing information and essential data controls.
